RCR AWARDED \$315M FOR DAYDREAM AND HAYMAN SOLAR FARM PROJECTS

Diversified engineering and infrastructure company RCR Tomlinson Ltd (ASX: RCR), is pleased to announce that it has been awarded two contracts, totalling approximately \$315 million for the Engineering, Procurement and Construction (“EPC”) and Operation and Maintenance (“O&M”) for the 150MWac Daydream Solar Farm and the 50MWac Hayman Solar Farm, developed and maintained by Edify Energy Pty Ltd.

RCR’s scope of work includes engineering, procurement, construction and commissioning of the Solar Farms, including interface works to the project substations. Once commissioned RCR will provide O&M services for both Solar Farms for an initial period of 10 years, with an option for a further 5 year term.

The projects will start immediately, with construction scheduled to commence in Q3 2017.

The Daydream and Hayman Solar Farms are both located in Collinsville in Northern Queensland.

RCR Managing Director & CEO, Dr Paul Dalglish said “We are very pleased to continue our strong relationship with Edify Energy to deliver these two large-scale solar energy projects generating a combined 200MWac.

RCR now has over half a Gigawatt of large-scale solar projects in our order book and more than a Gigawatt currently being developed or progressed under early contractor involvement processes.

RCR has firmly positioned itself as one of Australia’s leading developers and EPC providers of large-scale solar and other renewable energy infrastructure. Our experience and application of Engineering Intelligence to renewable projects provides RCR with a significant competitive advantage.

RCR is currently preferred on a number of additional renewable energy projects that will support our further growth in FY18 and into FY19. Over the mid to long-term we expect to see the large-scale solar market continue to grow”, said Dr Dalglish.

About RCR

RCR Tomlinson Ltd (ASX code: RCR) is a diversified engineering and infrastructure company, working with some of the world's leading organisations to provide intelligent engineering solutions to the **Infrastructure, Energy** and **Resources** sectors. RCR has 119 years of history in the engineering sector and owns some of Australia's oldest engineering businesses including RCR Tomlinson™, O'Donnell Griffin™, Haden™, and Resolve FM™.

RCR's core capabilities encompass development, engineering, procurement, construction, operation and maintenance of major infrastructure, energy and resource projects. These include power generation plants (using a wide range of fuels, solar, wind and battery), water and waste treatment systems, rail and road tunnel infrastructure, rail signalling and overhead wiring systems, mineral processing and material handling plants, integrated oil & gas services (both onshore and offshore), supply of RCR proprietary materials handling and process equipment, and property services including facilities management, HVAC and electrical services.

RCR has operations across Australia, Asia and New Zealand. Additional information is available at www.rcrtom.com.au
