RCR AWARDED LIMITED NOTICE TO PROCEED FOR THE \$170M (APPROXIMATELY) HAUGHTON SOLAR FARM

Diversified engineering and infrastructure company, RCR Tomlinson Ltd (ASX: RCR), is pleased to announce that it has been awarded a contract to commence work under a Limited Notice to Proceed (“LNTP”) for the 100MWac Haughton Solar Farm, being developed by Pacific Hydro Australia (“Pacific Hydro”).

The LNTP provides for development of essential site works, engineering and design, and the procurement of critical and long-lead items.

The project is subject to final investment decision (“FID”) by Pacific Hydro and other approvals. RCR and Pacific Hydro will finalise the Engineering, Procurement and Construction (“EPC”) contract for the first stage (100MWac) of the Haughton Solar Farm, while engineering is based on Stage 1 and 2 totalling 300MWac. Stage 1 is expected to commence in March 2018 with commissioning expected to complete in January 2019.

The proposed Haughton Solar Farm has planning approval to extend capacity up to 500MWac and is located in south of Townsville in Queensland.

RCR Managing Director & CEO, Dr Paul Dalglish said “We are very pleased to be working with Pacific Hydro to deliver this significant large-scale utility solar energy project generating an initial 100MWac of power.

RCR continues to lead the development and EPC delivery of large-scale solar and other renewable energy infrastructure. The award also reflects RCR’s application of Engineering Intelligence to renewable projects, which provides RCR with a significant competitive advantage.

Subject to finalisation of an EPC contract, this new renewable energy project will add to RCR’s order book and positions RCR for growth in FY18 and into FY19, said Dr Dalglish.

Pacific Hydro

Pacific Hydro is a global renewable energy owner, operator and developer. It operates a diversified portfolio with an installed capacity of ~850MWac across Chile, Australia, and Brazil. Pacific Hydro is also developing a number of projects totalling over 2 GWac of potential capacity; and has a growing electricity retail business in Australia. www.pacifichydro.com.au

About RCR

RCR Tomlinson Ltd (ASX code: RCR) is a diversified engineering and infrastructure company, working with some of the world's leading organisations to provide intelligent engineering solutions to the **Infrastructure, Energy** and **Resources** sectors. RCR has 119 years of history in the engineering sector and owns some of Australia's oldest engineering businesses including RCR Tomlinson™, O'Donnell Griffin™, Haden™, and Resolve FM™.

RCR's core capabilities encompass development, engineering, procurement, construction, operation and maintenance of major infrastructure, energy and resource projects. These include power generation plants (using a wide range of fuels, solar, wind and battery), water and waste treatment systems, rail and road tunnel infrastructure, rail signalling and overhead wiring systems, mineral processing and material handling plants, integrated oil & gas services (both onshore and offshore), supply of RCR proprietary materials handling and process equipment, and property services including facilities management, HVAC and electrical services.

RCR has operations across Australia, Asia and New Zealand. Additional information is available at www.rcrtom.com.au
